OvisLink
The Total Networking Solution

Evo FSH-8C

Fast Ethernet Switch Model Evolution

8 RJ45 10/100 Mbps. ports
Auto MDI/MDI-X

Design and Technology.

The Evolution Range is characterised by its small size. Compact and made of very light, highly resistant materials, they provide considerable saving in money and space, which is indispensable in SOHO environments.

Its smooth, harmonic design conceals the latest technology, which can provide the services needed for SOHO environments that handle large amounts of information.

All of the ports of this switch have the Auto MDI/MDI-X function, which definitively eliminates the need to use crossed cables. Thanks to its excellent design, by means of the LED's and a simple glance, one can recognise the functioning state of all of the ports.

Technical features

- **Standards:**
  - IEEE 802.3 10Base-T
  - IEEE 802.3u 100Base-TX
  - IEEE 802.3u Nway auto-negotiation
  - IEEE 802.3x Full-Duplex and Flow Control
- **Protocol:** CSMA/CD
- **Topology:** Star
- **Transmission Mode:** Store and Forward.
- **Automatic configuration:** Plug & Play.
- **Memory:**
  - 8K for MAC address table.
  - 2 Mb of memory buffer.
- **Cable distance:** 100 m.
- **Size:**
  - EvoFSH-8C: 160x82x27 mm.
- **Weight:** 190 g.
- **Power Supply:** +7.5VDC@1.2A
- **Security/EMI:** Standard UL, FCC, CE, Korea EMI.
